Profession

I am a Front-End Developer with 6 months of experience in web development, specializing in the design, development and implementation of modern, user-friendly web interface. I have a strong passion for creating website and web application. My skill set includes HTML, CSS, JavaScript and React. In addition, I have experience working with version control system.

PROFESSIONAL EXPERIENCE

Headway vision – Chandigarh, India

Front-End Developer, September 2022 – February 2023

As a Front-End Developer at Headway Vision, I contributed to the development of several web applications, collaborating with a team of designer, developers and projects managers. During my time at the company, I gained experience in using React JavaScript, Tailwind CSS, Git and as well as in developing and maintaining responsive designs and cross-browser compatible web applications.

- Developed several React.js and Tailwind applications for the company's customers.
- Wrote clean and well-structured code, optimized for scalability and performance.
- Implemented modern web design best practices for an aesthetically pleasing user-interface.

Projects

- Netflix Landing Page Clone using React and Tailwind CSS.
- To-do App
- Google Keep Clone.
- Working on live projects (pocketpills.com & lalpathlabs.com)

EDUCATION

KURUKSHETRA UNIVERSITY – Kurukshetra

Masters in statistics, May 2022

SKILLS

- HTML5, CSS & JavaScript
- Es6, GitHub
- React, Tailwind CSS, Styled Components
